

FOR IMMEDIATE RELEASE

VOTER INTEGRITY PROJECT - voterintegrityproject.vote@gmail.com

7 November 2020

We observed a large anomaly in Henry County, Georgia.

As per the US Census in 2010, it had a population of 203,777. The 2019 estimated population was 234,561. This indicates a growth of 15.1% or 30,777 people in the course of a decade.

<https://www.census.gov/quickfacts/fact/table/henrycountygeorgia/PST045219>

We estimated that the population in 2016 was around 222,245 using a linear growth rate of 1.5% per year. The population has not exploded, but rather remained fairly consistent.

The voter turnout in 2008 was 43%, and in 2016 was 42.98%, indicating a consistent pattern with the population growth for nearly a decade.

Vote totals are from the NY Times in 2008:

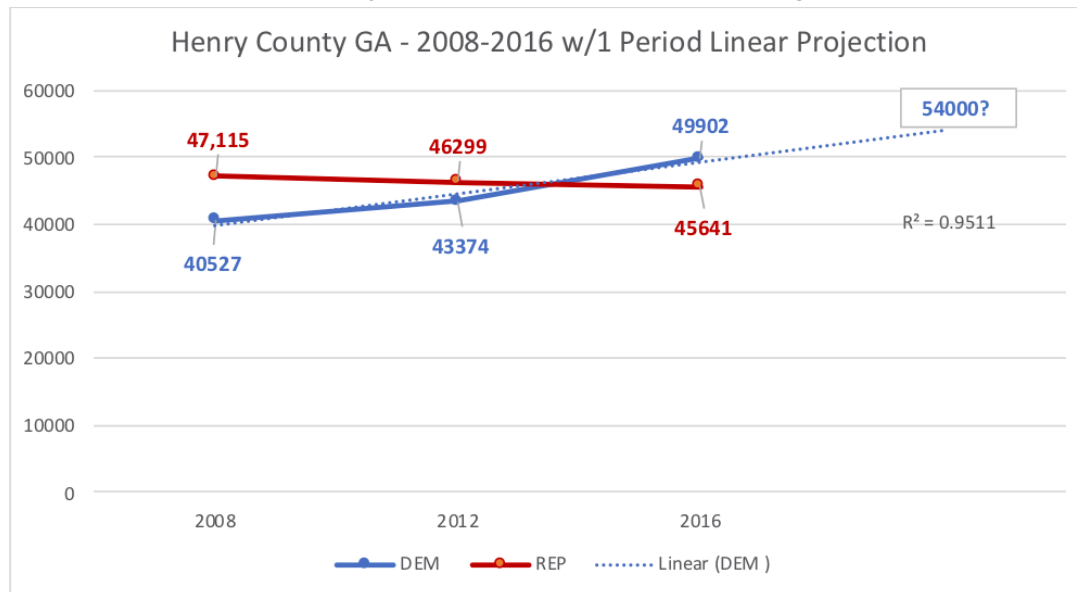

<https://www.nytimes.com/elections/2008/results/states/president/georgia.html>

Vote totals are from Politico for 2012 and 2016:

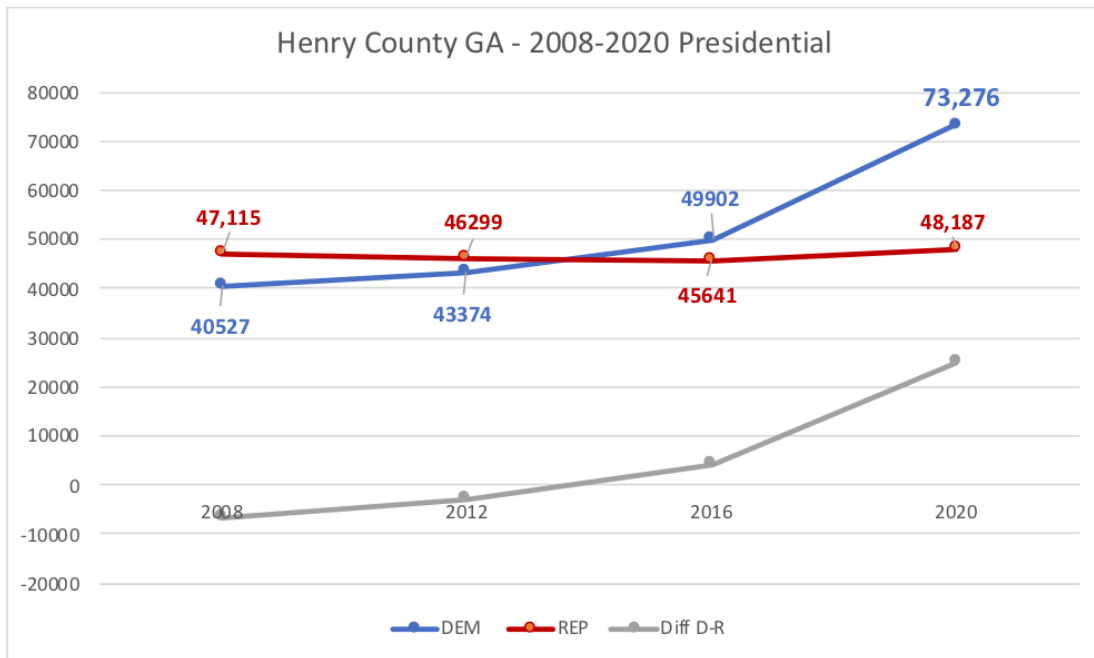

<https://www.politico.com/2012-election/results/president/georgia/>

<https://www.politico.com/2016-election/results/map/president/georgia/>

Projected votes based on voting patterns

Actual Votes

In 2020 we estimate that at least approximately 51.91% of the population voted (all Democratic party voters plus all Republican party voters divided by the 2019 population) or nearly a 10 percent increase in overall voting population per the estimates from Politico.

Although an estimate, we believe it's a higher percentage due to 3rd party voters:

<https://www.politico.com/2020-election/results/georgia/>

Additionally, we discovered a 64.2% increase in Democratic party voters from the prior three election averages, but no similar results with Republican party voters. The slight Republican party increase in numbers is consistent despite the decline from 2008-2016.

	DEM	REP	Diff D-R
2008	40527	47,115	-6,588
2012	43374	46299	-2,925
2016	49902	45641	4,261
2020	73,276	48,187	25,089
Change 2016-2020	46.8%	5.6%	
Avg, '08, '12, & '16 Elections	44601	46,352	
Change '20 from Average	64.3%	4.0%	

This discovery reveals a 48.6% increase in Democratic party turnout from 2016 and a 64.2% increase in Democratic party turnout over the past three Presidential elections, which means that Democrat party nominee Joe Biden got about 30,000 more votes than President Barack Obama did in the 2012 election. We are currently looking at other counties with similar patterns.
