

## Wayne County – Voter Registration Anomalies

Upon investigation of complaints regarding poll workers in Detroit Michigan witnessing inputs of incorrect dates of 1/1/1900 for either Date of Birth (DOB) and/or Date of Registration (DOR).

Michigan voter roles (dated 12-Oct-2020) were queried to find both DOBs and DORs with a year registered as 1900. The 1900 number is significant as it is used as the default date in many database technologies. Often this date is used as a place holder if NULL (or empty) values are not expected due to validation (meaning the software interfacing with the database does not accept “NO DATE” values).

It is reasonable to expect glitches and clerical errors to occur on occasion resulting in this date. Our findings however, showed great statistical anomalies that should be investigated.

A query of registered voters with a DOR of 1900 yielded 21,694 results. Anomalies appeared immediately when comparing the two largest counties.

**WAYNE:** 15,975 voters returned with registration on year 1900 (population approximately 1.7 million).

**OAKLAND:** 347 voters returned with registrations on year 1900 (population approximately 1.2 million).

The increase in erroneous registration is incredibly significant in Wayne county and it signals improper registration management. The ratio of improperly managed roles for Wayne county are as follows:

**TOTAL REGISTERED VOTERS: 491,821**

**TOTAL INVALID REGISTRATION DATES: 15,975**

**PERCENTAGE OF INVALID REGISTRATION DATES: 3.24%**

The argument could be made that Wayne county does not know the dates many of its voters registered, but this may be a poor argument as surrounding counties have incredibly clean voter roles in comparison.

If complaints are being made of poll workers “modifying” the DOBs and DORs of voters, then these statistical anomalies should be considered with great weight. This could signal intentional, and possibly illegal data manipulation. A list of voters exhibiting invalid DORs is contained in this document. It should also be noted that queried data does not contain new registrations between 12-OCT-2020 and Election Day (3-NOV-2020).

These numbers may be significantly higher if the complaints are true.
